

# PROSNOW: WORKFLOW

Ski resorts already rely on several tools for snow managements. PROSNOW does not aim at adding more tools and screens !

The goal is rather to mainstream PROSNOW information into existing snow management software and tools for snowmakers, snow groomers, other relevant services.

Work is in progress to:

- Define relevant PROSNOW output to be ingested in third-party software
- Define appropriate APIs for data transfer in/out the PROSNOW platform
- Define the business model / IPR protection / licensing scheme
